

Download 2011 Mustang Gt Manual Vs Automatic

The manual vs. automatic rivalry rages on and the comparison between the two has never been hotter! Credit Ford for fanning the flames with the awesome 5R55S (2005-2010 Mustang GT) and 6R80 (2011 5.0L Mustang) automatic transmissions as they have gone toe-to-toe on the drag strip with stick-shift equipped Mustangs. Mustang Transmissions: Automatic vs Manual. Whether it's a weekend cruiser and easy daily driving that you're after, or an all-around driver's car that is a blast to drive on the twisties, there really isn't a right answer when it comes to choosing the right transmission for your Mustang. It comes down to personal preference and lifestyle. And in distance timing, only one thing matters, 1/4 mile. The manual is about 1/2-3/4 second faster than the automatic, which isn't a small amount. Also, the automatic has the speed limiter set lower (142) than the GT (155). Can't help you on the standard vs premium, but I'd bet the premium has leather/mach 1000 standard, along with other niceties.
