

Download Teradyne Flex Tester Manual

The microFLEX and FLEX test systems deliver cost-efficient multisite production test for devices operating under 200 MHz digital speed. Choose microFLEX / FLEX for testing mid-range devices for power management, automotive, audio and video. With microFLEX / FLEX, you optimize capital investment while achieving superior performance and throughput. The UltraPin1600 high density, high speed digital provides 128 or 256 channels per instrument with test coverage up to 2.2Gbps. The UltraPin1600 implements Teradyne's groundbreaking multicore, hardware-based Protocol Aware capability that allows individual pin groups to be slaved to device data rate and timing and eliminates the need for digital patterns for programming standard data busses. Introducing the Teradyne FLEX Test System and its differences to J750. Introducing the Teradyne FLEX Test System and its differences to J750. FLEX Introduction 2/2004 2 Introducing the FLEX.
